REFERENCE AID

DIRECTORY OF OFFICIALS OF THE PEOPLE'S REPUBLIC OF CHINA

A (CR) 75-16
(Supersedes A 73-35)
April 1975

PREFACE

This directory identifies personalities in the People's Republic of China currently holding positions in the Chinese Communist Party, revolutionary committees, military organizations, the national government, the diplomatic and consular service, legislative bodies and selected mass and scientific organizations. It is based primarily on Chinese news sources. The alphabetical name index includes Standard Telegraphic Codes where available.

In most cases where Standard Telegraphic Codes are not available, the names of officials are taken from monitored radio broadcasts and have not been confirmed in the press. Variations in regional dialects and radio interference may have caused some duplication and/or inaccurate rendition of names appearing in this directory. The names of officials who are known to be female are followed by the letter (f) in this publication.

Generally, the directory includes only those individuals who were identified in specific positions during the period January 1973-January 1975. Individuals identified in positions before January 1973 are included if they have recently appeared without being specifically identified and/or if they are still believed to hold their earlier positions. The most recent public appearances of top officials have been noted in footnotes if these officials have not been identified in their specific positions since January 1973.

In most instances, this directory gives the earliest and latest date on which a person was identified in a position. For members of the Central Committee of the Chinese Communist Party and officers of the Fourth National People's Congress, the date given is the officially announced date of their election to these organizations. No specific dates are listed for "responsible persons" of unidentified departments under the Central Committee, the State Council and the People's Liberation Army, because they have been mentioned only

on rare occasions. Except for members of highly specialized technical organizations, local offices of national-level organizations are listed in the provincial section of this directory.

The Chinese Communists use the deliberately vague terms "leading member," "responsible person" and "responsible person of PLA unit" to designate individuals who possess some degree of political or military responsibility. When an individual designated in Chinese Communist media only as a "leading member" or "responsible person" is also identified in a specific position, that position is listed.

The orthography used in the directory follows the Wade-Giles system for the romanization of Chinese characters. Names of Chuang, Tibetan, Uighur and other minority leaders are given in Chinese phonetics.
